

PRESERVE. MONETIZE

STORAGE SOLUTIONS FOR CELLULOID FILMS

Your valuable films require the attention of professionals if you want to preserve and monetize them for the future.

Climate control is one of the most important determining factors in the life expectancy of motion picture film. It has been scientifically established for long that storing film in cold temperatures under proper environmental conditions prolongs the film's life. The best storage solution for motion picture film is cold storage, moderate humidity conditions and good-quality storage enclosures. We at Prasad provide just that to take care of your precious assets - The best storage option known to science as of now!
